

RE-IMAGINE YOUR CONCRETE FLOOR IN FIVE EASY STEPS.

- 1 SURFACE PREP.** Floor preparation.
- 2 STAIN.** Apply two coats of concrete acid stain color.
- 3 NEUTRALIZE.** Neutralize stain and remove residue.
- 4 PROTECT.** Apply protective sealer, coating or wax.
- 5 MAINTAIN.** Clean and wax regularly.

Concrete must be in good condition, untreated, unsealed, and never acid etched. Otherwise additional cleaning, stripping or abrading of surface will be required.
